

December 22, 2016

Board of Trustees
Educational Retirement Board of New Mexico
P.O. Box 26129
Santa Fe, NM 87502-0129

**Subject: GASB Reporting and Disclosure Information for ERB Fiscal Year Ending
June 30, 2016**

Members of the Board,

This report provides information required by the Educational Retirement Board of New Mexico (ERB) in connection with the Governmental Accounting Standards Board (GASB) Statement No. 67, "Financial Reporting for Pension Plans." Additionally, this report provides information required by the governmental employers participating in ERB in connection with the GASB Statement No. 68, "Accounting and Financial Reporting for Pensions." It is our understanding this information will be used by governmental employers in financial reporting for the fiscal year ending June 30, 2017. The information provided herein was prepared for the purpose of assisting ERB and the governmental employers in the compliance with the financial reporting and disclosure requirements of GASB Statement Nos. 67 and 68.

The Net Pension Liability is not an appropriate measure for measuring the sufficiency of plan assets to cover the estimated cost of settling the employer's benefit obligation. The Net Pension Liability is not an appropriate measure for assessing the need for or amount of future employer contributions. A calculation of the plan's liability for purposes other than satisfying the requirements of GASB Statement Nos. 67 and 68 may produce significantly different results. This report may be provided to parties other than ERB only in its entirety and only with the permission of ERB.

The total pension liability, net pension liability, and certain sensitivity information shown in this report are based on an actuarial valuation performed as of June 30, 2015. The total pension liability was rolled-forward from the valuation date to the plan year ending June 30, 2016 using generally accepted actuarial principles. There were no significant events or changes in benefit provisions that required an adjustment to the roll-forward liabilities as of June 30, 2016. For purposes of projecting future benefits, it is assumed that the full COLA will be paid in all future years. It is our opinion that the recommended assumptions are internally consistent, reasonable, and comply with the requirements under GASB Statement Nos. 67 and 68.

This report provides the Collective Pension Amounts under GASB Statement No. 68 which will be allocated to the governmental employers participating in ERB. It is our understanding that each governmental employer's proportionate share will be determined based on the employer's contribution to ERB as a percentage of the total contribution to ERB by all employers. It is also

our understanding that the proportionate share of the Collective Pension Amounts associated with the governmental employers will be calculated by ERB.

This report is based upon information, furnished to us by ERB, which include benefit provisions, membership information, and financial data. We did not audit this data and information, but we did apply a number of tests and concluded that it was reasonable and consistent. GRS is not responsible for the accuracy or completeness of the information provided to us by ERB.

Certain tables included in the Required Supplementary Information should include a 10-year history of information. As provided for in GASB Statement Nos. 67 and 68, this historical information is only presented for the years in which the information was measured in conformity with the requirements of GASB Statement Nos. 67 and 68. The historical information in this report will begin with the information presented for the ERB fiscal year ending June 30, 2013.

Paragraph 57 of GASB Statement No. 68 indicates that contributions to the pension plan subsequent to the measurement date of the Net Pension Liability and prior to the end of the employer's reporting period should be reported by the employer as a deferred outflow of resources related to pensions. The information contained in this report does not incorporate any contributions reported to ERB subsequent to June 30, 2016.

This report complements the actuarial valuation report as of June 30, 2016, provided for plan funding purposes, which was also provided to ERB and should be considered together as a complete report for the plan year ending June 30, 2016. Please see the actuarial valuation report as of June 30, 2015 and the Actuarial Experience Study report, dated June 12, 2015, for additional discussion of the actuarial valuation that was used in the roll-forward, including the nature of actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions.

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. Falls and Mr. Randall are members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein.

Respectfully submitted,

R. Ryan Falls, FSA, MAAA, EA
Senior Consultant

Mark R. Randall, FCA, EA, MAAA
Chief Executive Officer

Summary of Population Statistics

The total pension liability described in this report is based on the ERB plan membership as of June 30, 2015:

Summary of Population Statistics

Inactive Plan Members or Beneficiaries Currently Receiving Benefits	44,043
Inactive Plan Members Entitled to But Not Yet Receiving Benefits	41,048
Active Plan Members	<u>60,998</u>
Total Plan Members	146,089

Measurement of the Net Pension Liability

The net pension liability is measured as the total pension liability, less the amount of the plan's fiduciary net position. In actuarial terms, this is analogous to the accrued liability less the market value of assets (not the smoothed actuarial value of assets that is often encountered in actuarial valuations based on the Board's adopted assumptions and methods).

A single discount rate of 7.75% was used to measure the total pension liability as of June 30, 2015 and June 30, 2016. This single discount rate was based on an expected rate of return on pension plan investments of 7.75%. Based on the stated assumptions and the projection of cash flows, the pension plan's fiduciary net position and future contributions were projected to be available to finance all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The projection of cash flows used to determine this single discount rate assumed that plan member and employer contributions will be made at the current statutory levels. Additionally, contributions received through Alternative Retirement Plan (ARP) are included in the projection of cash flows. ARP contributions are assumed to remain a level percentage of ERB payroll, where the percentage of payroll is based on the most recent five-year contribution history.

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption

Below is a table providing the sensitivity of the net pension liability to changes in the discount rate as of June 30, 2016. In particular, the table presents the plan's net pension liability, if it were calculated using a single discount rate that is one-percentage-point lower or one-percentage-point higher than the single discount rate:

1% Decrease	Current Single	1% Increase
6.75%	Rate Assumption	8.75%
	7.75%	
\$ 9,531,509,131	\$ 7,196,433,561	\$ 5,258,980,529

STATEMENT OF CHANGES IN FIDUCIARY NET POSITION

Notes to Schedule:

The change in total pension liability due to assumption changes for the fiscal year ending June 30, 2013 includes the impact of the new assumptions adopted by the Board on April 26, 2013 as well as the change in the single discount rate between June 30, 2012 and June 30, 2013. The change for the fiscal year ending June 30, 2015 includes the impact of the new assumptions adopted by the Board on June 12, 2015.

The covered employee payroll is the actual payroll, imputed from the total employer contribution for active members, for the fiscal year ending June 30.

SCHEDULES OF REQUIRED SUPPLEMENTARY INFORMATION

Schedule of Employer Contributions

FY Ending June 30,	Actuarially Determined Contribution	Actual Contribution	Contribution Deficiency (Excess)	Covered Payroll	Actual Contribution as a % of Covered Payroll
2013	\$ 480,700,326	\$ 299,657,530	\$ 181,042,796	\$ 2,706,170,349	11.07 %

NOTES TO SCHEDULE OF CONTRIBUTIONS

Valuation Date: June 30, 2015

Notes Actuarially determined contribution rates are calculated as of June 30. Members and employers contribute based on statutorily fixed rates.

Methods and Assumptions for Actuarially Determined Contribution Rate for Fiscal Year:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Payroll
Remaining Amortization Period	Amortized over a closed 30-year period from June 30, 2012, ending June 30, 2042
Asset Valuation Method	5-year smoothed market
Inflation	3.00%
Salary Increases	Composed of 3.00% inflation, plus 0.75% productivity increase rate, plus step-rate promotional increases for members with less than 10 years of service.
Investment Rate of Return	7.75%
Retirement Age	Experience-based table of rates based on age and service. Adopted by the Board on June 12, 2015 in conjunction with the six year experience study for the period ending June 30, 2014.
Mortality	Healthy Males: RP-2000 Combined Mortality Table with White Collar adjustments, generational mortality improvements with Scale BB Healthy Females: GRS Southwest Region Teacher Mortality Table, set back one year, generational mortality improvements in accordance with Scale BB from the table's base year of 2012

GOVERNMENTAL EMPLOYER FINANCIAL STATEMENTS**Pension Expense for ERB Fiscal Year Ending June 30, 2016**

To be used for Governmental Employer Reporting for Fiscal Year Ending June 30, 2017

Expense

1. Total Service Cost	\$ 356,873,760
2. Interest on the Total Pension Liability	1,367,647,222
3. Current-Period Benefit Changes	0
4. Member Contributions	(295,946,396)
5. Projected Earnings on Plan Investments	(888,341,965)
6. Administrative Expense	9,660,510
7. Other Changes in Plan Fiduciary Net Position	0
8. Recognition of Deferred Outflow (Inflow) of Resources due to Liabilities	35,932,800
9. Recognition of Deferred Outflow (Inflow) of Resources due to Assets	65,047,886
10. Total Pension Expense	\$ 650,873,817

Recognition of Deferred Outflows and Inflows of Resources

According to paragraph 33 of GASB No. 68, *differences between expected and actual experience and changes in assumptions* are recognized in pension expense using a systematic and rational method over a closed period equal to the average of the expected remaining service lives of all employees that are provided with pensions through the pension plan (active employees and inactive employees) determined as of the beginning of the measurement period.

At the beginning of the 2016 fiscal year, the expected remaining service lives of all employees was 551,198 years for ERB. Additionally, the ERB plan membership (active employees and inactive employees) was 146,089. As a result, the average of the expected remaining service lives for purposes of recognizing the applicable deferred outflows and inflows of resources established in the 2016 fiscal year is 3.77 years.

Additionally, *differences between projected and actual earnings on pension plan investments* should be recognized in pension expense using a systematic and rational method over a closed five-year period.

For this purpose, the deferred outflows and inflows of resources are recognized in the pension expense as a level dollar amount over the closed period identified above.

GOVERNMENTAL EMPLOYER FINANCIAL STATEMENTSStatement of Outflows and Inflows Arising from Current and Prior Reporting Periods
For ERB Fiscal Year Ending June 30, 2016

To be used for Governmental Employer Reporting for Fiscal Year Ending June 30, 2017
